

Mahmoud Abdelghfar Ahmed

Web Designer, Junior Network Engineer

AlMinya • Mallawi • Phone: 01012132157 • Email: golobyoda@gmail.com
• LinkedIn www.linkedin.com/in/mahmoud-abdelghfar/

Summary

- **Motivated Junior Network Engineer with a solid foundation in networking concepts, including TCP/IP, routing protocols (OSPF, EIGRP), and network security. Skilled in configuring and troubleshooting Cisco routers and switches.**
Additionally, proficient in Web Design, with hands-on experience in HTML, CSS, and responsive design. Passionate about technology, problem-solving, and continuous learning.
 - **Seeking an opportunity to apply my skills in networking and web technologies while expanding my expertise in IT infrastructure and cybersecurity.**
-

Education

- Assuit Internatiol University of Technology [2023] - [2027]
- Information Technology (IT)
-

Skills

- | | |
|-----------------------------|-----------------|
| • Java Script Basics | • CSS |
| • CCNA | • HTML |
| • C# | • CCNA Security |
| • Cisco Packet Tracer, GNS3 | • WireShark |
-

Experience

- **Network Engineer (Self-Initiated Projects) [2024] - [present]**
 - Designed and implemented small to medium-sized network topologies using Cisco routers and switches on Cisco Packet Tracer and GNS3.
 - Configured VLANs, trunking, inter-VLAN routing, DHCP, and NAT for simulated company networks.
 - Built secure site-to-site VPN tunnels between multiple remote branches.
 - Applied Access Control Lists (ACLs) to restrict and filter network traffic.
 - Troubleshoot routing issues and optimized network performance using OSPF.
 - Documented network designs using digrams and step-by-step configuration scripts.

- **Junior Developer (Freelance/Practice Projects)** **[2024] – [present]**
 - Built simple websites using HTML, CSS, and JavaScript for practice and mock clients.
 - Designed responsive layouts and interactive UI elements.
 - Developed basic desktop tools using C# for automation and network testing.
-

Projects

- **Banking Network Project – Cisco Packet Tracer :**

- Designed and implemented a secure and scalable banking network across multiple departments and floors using Cisco Packet Tracer.
- Configured routers, managed switches, and VLANs to ensure segmentation, enhanced security, and efficient routing/switching.
- Deployed DHCP, firewall, and print servers to support network services and operational needs.
- Integrated wireless access points to provide seamless connectivity for mobile and remote users.
- Applied access control policies and simulated data flow to test network stability, security, and performance.
- Strengthened expertise in inter-VLAN routing, network troubleshooting, and securing multi – floor enterprise environments.

- **Chat Application Using C# and TCP :**

- Developed a real-time chat application using TCP sockets in C# with a Windows Forms interface.
- Designed the server-side logic to handle multiple concurrent client connections with multithreaded programming.
- Implemented file sharing functionality between clients (images, documents, ect.).
- Enabled message broadcasting, chat history saving, and clean GUI navigation.
- Collaborated with a team of 5, coordinating work through version control and regular code reviews.

Technologies Used :

- C#, .NET, Windows Forms, TCP Sockets, Multi-threading

Team Role :

- Lead server-side developer (network communication and client management)
- Other members contributed to client-side UI, file handling, testing, and documentation.

- **Weather App**

- Developed a weather application using **Kotlin** that allows users to view weather forecasts by entering their location.
-

Courses

- **HTML & CSS (Mahrah-tech)**

- **CCNA**
 - ***Database fundmantels sql – server (Maharh-tech)***
-

Languages

- **English : very good (reading , writing , convirsation)**
